August 25, 2021

Dear Valued Customer-

It is clear, the difficulties in obtaining raw materials to manufacture our product, is not going away as fast as we would like. The price continues to rise in procurement of these necessary petrochemicals.

We are enacting an additional .03 cent surcharge on our FRP material effective September 1, 2021. This will be attached to all orders that ship on or after this date.

As stated in our prior price increase announcements, we closely monitor the petrochemicals markets and once we see relief, the surcharges will be relaxed.

We recognize and appreciate the continued support that you, as our loyal customers continue to provide us.

Very Sincerely,

Tom Ross

National Sales Manager, FRP
