

PRICING BULLETIN

January 18, 2022

Dear Marlite Customers,

The global demand for fiberglass continues to far exceed supply. Naturally, we are seeing this imbalance reflected in the cost of fiberglass – a major raw material component of FRP Panels. Coupled with adverse conditions in transportation and other raw materials, Marlite must adjust prices on the following products:

- Standard FRP Panels 9%

The new prices are effective on Monday February 14, 2022. Existing prices are effective on all orders of typical volume placed on or before Friday February 11, 2022 and shipped within normal lead times.

We are assessing the impact these most recent increases are having on our value-add FRP Products. In the meantime, we remain hopeful things will begin to normalize as we approach the latter half of the year. But, for now, we collectively continue to grow tired of writing and receiving these increase announcements.

Sincerely,

A handwritten signature in black ink, appearing to read "Greg Triplett".
