

December 6th, 2024

Dear Valued Customer,

In 2024, we have incurred substantial increases in our netting production costs. The largest portion being our raw material, low-carbon steel.

Because of these higher steel wire manufacturing costs, Tree Island Steel is implementing a price increase of \$2 per roll for all 20ga K-Lath stucco netting products and \$3 per roll for all 17ga K-Lath stucco netting products, effective for all shipments on or after January 2, 2025.

Your Sales Representative will follow up with you directly on this price increase. We appreciate your business and thank you for your support.

Respectfully,

Dan Buck
Senior Director, Sales & Marketing
Tree Island Steel
