

CONFIDENTIAL – FOR AUTHORIZED DISTRIBUTORS ONLY

Upcoming June 1, 2025 Price Change

As we continue to adjust our business to protect service levels and competitiveness for our distributors and customers in the current trade environment, please see the announcement below on a shift from surcharges to price, and other tariff-related impacts.

Over the past 4 months we have worked diligently to reduce the impact of tariff-related costs by:

- Utilizing our global and local manufacturing footprint to shift source countries of finished goods.
- Leveraging our strategy of multiple qualified raw material suppliers by localizing supply or moving raw materials out of China to mitigate the impact of tariffs.
- Absorbing a portion of the cost of raw material increases, some of which are unavailable outside of China.

While these strategies have helped us stabilize and reinforce our supply chain, they have also driven our raw material costs higher than the pre-tariff levels. With hopes to simplify the price structure, we will make the following adjustments on June 1.

- We will remove the 4.3% blanket surcharge and the 25% line surcharge on items made in China on June 1.
- The impact of inflation due to the source country shifts will be rolled into the overall price of our products.
- The vast majority of our products will receive an adjustment between 4.3% to 5.1%, these adjustments are sourcing and raw material dependent.

Product Category	Adjustment
Adhesives	8 - 9.3%
Bonded Abrasives	4.6%
Coated Abrasives	4.3 - 4.8%
Construction Products	10.0%
Super Abrasives	4.9%
Sourced Items*	9.1%
Thin Wheel	5.1%

*May differ based on product category or source country

We believe this change will streamline the billing process and allow us to work towards stability with these mitigation actions. Updated price files will be communicated as soon as they are available. Please expect them the last week of May in a separate notification.

Our commitment to servicing you remains unchanged, and we are confident that this adjustment from surcharge to price will simplify billing, and the source country shifts will reinforce stability in the supply chain.

If you have any questions regarding this price structure change, please contact your Norton Abrasives sales representative.

Thank you for your continued partnership and support.
